

PROJECT 10 Open Source Network Arduino Platform(oSNAP)

SUMMARY STATUS REPORT

Week 8

1 Introduction

2 Progress summary

Further refinement of the communication library. We had some initial planning of several prototypes that would supplement the main T-Shirt idea. One of them was a LED light Mood indicator fetched from Myspace. We also had more planning and research programming going into the social library, but much work remains to be done on this part.

Open:

ComLib(bluetooth arduino-android comm)

Social Library

Prototypes

4 Planned work for next period

Finish communication libraries

Decide on design for social library

5 Updated risks analysis

Redesigning the social library plans too much will limit progress. HIGH risk.
